

## 770 - TARGET PRODUCTS / FORGE - INDUSTRIAL ENGINEERING - Abbotsford, B.C.

Forge-Industrial Engineering designs and builds equipment for both its parent company, Target Products, and other clients. To get the job done, including painting of large bulk handling equipment, this XP Series Megadome

was constructed, with a huge 42-foot wide roll-up fabrik door to allow access for robust pieces of equipment. The Megadome is covered with a FR-rated membrane for added protection.
