INDUSTRIAL

***Drying, and keeping it that way***— Coastland Wood stands as a worldwide leader in veneer production. Their cutting-edge facilities, combined with a skilled workforce and a commitment to high-quality customer service, allow them to provide exceptional products. Coastland's Annacis Island

drying facility is among the most modern, efficient, and productive drying facilities in North America. Ensuring the veneers remain dry is crucial for quality control, which prompted them to consider the expansion of their storage needs with a new 12,000 sq. ft. MegaDome® by BuildWorks.
