Just storage – For over 40 years, Pitt Meadows Plumbing and Mechanical Systems (PMPM) has been a prominent provider of plumbing and mechanical systems in British Columbia. Starting as a small family-run business, their innovative approach has propelled them to become one of the largest mechanical suppliers and installers in the region. As PMPM continues to

expand, coupled with an increased order lead time for supplies, there arises a consistent demand for cost-effective and practical storage space. To meet this requirement, they reached out to MegaDome by BuildWorks. The 80' wide x 176' long structure offers a 14,000-square-foot footprint, providing an ideal solution at a highly affordable price.
