

EMCO CORP.

3048 | CHILLIWACK, BC | Ez40G 40x88 | INDUSTRIAL

Made to fit— EMCO Corporation, a preferred choice among plumbing, hydronics, and HVAC trade contractors in Canada, sought a swift and practical solution for their industrial storage requirements at the Chilliwack location. Turning to MegaDome by BuildWorks proved instrumental. The Megadome’s

planning and design team successfully navigated site restrictions by offering a customized side access solution. The single-tube steel arch structure was efficiently supported on a single course of modular concrete lock-blocks, presenting a cost-effective yet fully engineered solution.
