WASTE AND RECYCLING

A Mini Mega' Solution - Managed by the Regional District of Okanagan South, the Oliver and District Landfill offers waste disposal and yard waste composting. The newly constructed composting facility required an enclosed tipping area. A MegaDome® XP33

with a 35 feet length, was installed on two rows of precast concrete blocks. With 10-foot straight walls and a 5-foot-high concrete block foundation, the MegaDome serves as the optimal covered space for receiving and preparing organic waste.
